macOS 10.13 or above

Linux Ubuntu 20.04 or above (64-bit)

• CPU

Intel Core i5 or better

or AMD equivalents

For AI audio high-quality editing:

4th Generation Intel Core i5 (i5-4xxx) or better recommended

AMD Athlon X4 845 or better, including Ryzen series

• Memory

2 GB or more

- Hard disk space

1 GB or more

*The required space depends on the number of voice databases installed.

- Display resolution

1280 × 800 or better

■ Activation code

The activation code for this software is treated as the equivalent of the product. If the activation code is lost, the product itself will also be considered lost. Therefore, please note that we cannot reissue the activation code, and any other content as well. We ask for your understanding in advance.

■ License

If you wish to install this product in a different environment, you can deactivate (canceling the certification) on Synthesizer V Studio in advance to transfer it to a different PC.

■ Returns

Please note that no returns can be accepted once the product is opened.

If you wish to exchange or return the product due to a defect, please file a report via the official Bushiroad Music website (<https://bushiroad-music.com/contact>).

■ Others

Audio device and internet connection required

*Your computer must be connected to the internet for activation (registration), updating to the latest version, and user support (inquiries regarding the software, etc.).

*Meeting the requirements above does not guarantee that the software will run on all computers.

*Performance may vary depending on the overall performance of your computer, including the number of tracks that can be used at the same time.

*Synthesizer V Studio must be installed before installing the singing database.

■ Inquiries

For inquiries regarding problems with your activation code or questions regarding

[Synthesizer V AI Yumenokessho POPY], please visit the official Yumenokessho website at the URL below.
